Profile

I am a dedicated and skilled developer with hands-on experience in a variety of technologies. I have worked on several projects utilizing modern JavaScript frameworks and libraries for front-end development. I am proficient in both relational and non-relational databases and have collaborated on multiple projects throughout my studies.

Professional Experience

2023/06 – 2023/08
Gujrat, Pakistan

MERN Stack Intern
ITT HUB (Information Technology Hub)
- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js (MERN stack).
- Developed applications using React, including a food ordering site **website** ↗ and a word counter with text manipulation **website** ↗ , as well as a full-stack note-taking app with the MERN stack.

2022/07 – 2022/09
Bahawalpur, Pakistan

Front End Developer
Glims Technologies.com pvt. Limited
- Developed and maintained responsive web pages using HTML, CSS, and JavaScript.
- Collaborated with the design team to implement UI/UX improvements.
- Gained hands-on experience in creating dynamic and interactive web applications.

Education

Bahawalpur, Pakistan

BS Computer Science(CS) [3.2CGPA]
The Islamia University of Bahawalpur

Projects

Food Flow ↗
Developed a fully responsive and interactive food delivery **web** ↗ application using React.
Technologies: React, Context API, CSS
Key Features: Category Filtering | State Management | Responsive Design | Cart Functionality | User Interface

Personal Portfolio
Technologies Used: React
Developed a personal portfolio website to showcase projects, skills, and experience. Utilized React for dynamic content rendering and smooth navigation

Quick Budget | Final Year Project
Technologies: Next.js, Django
Developed a full-stack expense tracker application, "Quick Budget," designed to help users efficiently manage and track their expenses. Used Next.js for the front end and Django for the back end.
Key Features: User Authentication | Data Visualization | API Integration

TextUtils-Word Counter ↗
Developed a web application called "TextUtils Word Counter"
as a personal project to practice React and Javascript.

NoteBook App
Mern Stack Application
A full-stack web application for taking and managing notes, built using the MERN stack. Users can create, edit, and delete notes, along with adding tags for easy categorization.
